Protecting Against Terrorism

What is project Argus?

Project ARGUS is a National Counter Terrorism Security Office (NaCTSO) initiative, exploring ways to aid you in preventing, handling and recovering from a terrorist attack.

It achieves this by taking businesses through a simulated terrorist attack. The simulation identifies the measures to take for preventing, handling and recovering from a terrorist attack.

What you can expect?

Argus is a completely free event which takes you through a realistic terrorist attack using a multi-media simulation. A series of questions and challenges are put to you, both individually and as a group and will have to resolve them. You will work in small syndicate groups with other local business representatives. The whole event including a coffee break will last three hours.
